About CIOE

The **26th China International Optoelectronic Exposition (CIOE 2025)** will take place from **September 10–12, 2025**, at the **Shenzhen World Exhibition and Convention Center**. As a premier event covering the entire optoelectronics industry chain, CIOE gathers over 3,800 top exhibitors from 30+ countries and regions. Co-located with eight events covering sectors such as **information and communication, precision optics, laser and intelligent manufacturing, infrared, intelligent sensing, display technologies, AR & VR, photonic innovation**, etc. CIOE serves as a one-stop efficient procurement platform for industry professionals to source materials, components, equipment, and solutions. It is also an ideal trade hub for precise business matching, networking, and discovering the latest industry trends.

Highlights of CIOE 2025

Optical Communication

The surge in AI computing power has dramatically increased traffic demand, leading to the deployment of **800G** networks and the maturation of **1.6T** technologies. Innovations such as **LPO/CPO** are becoming essential as AI's stringent requirements for low latency, high bandwidth, and energy efficiency drive rapid advancements in **LPO/CPO** and silicon photonics.

Optics

The convergence of **optical components, lenses & modules**, and **new materials** is fueling continuous advancements in high-end manufacturing, intelligentization, and integration technologies across diverse application fields. Precision optical manufacturing relies on **high-precision micro-nano processing**, with **nanoimprint lithography** emerging as a frontier technology in nano optics.

AR/VR

AR and VR optical technologies are entering a pivotal phase of industrialization and innovation. High-purity silicon carbide offers exceptional optical performance, while **metasurface materials** are gaining significant attention. In VR, **folded Pancake optical solutions** are becoming mainstream, with curved film lamination as a key manufacturing technique. In AR, **lightweight optical waveguides** with high transmittance are showing tremendous potential for diverse applications.

Highlights of CIOE 2025

Laser

Industrial lasers are evolving from mere tools to core enabling technologies for intelligent manufacturing. The focus is on higher power, shorter pulse widths, greater intelligence, and broader applications. Advances in laser technology are driving rapid growth in **special fibers** and **ultrafast lasers**. Laser equipment integrated with **AI algorithms** enables self-optimizing cutting paths and real-time monitoring of welding quality, facilitating the creation of smart production lines.

Infrared

Infrared technology is transitioning from military applications to civilian sensing infrastructure. Innovations in materials and rapid process advancements are enhancing the sensitivity of **infrared detectors**, leading to miniaturization and integration. The applications of **infrared thermal imaging** are expanding rapidly in security, industrial inspection, intelligent driving, and medical diagnosis, with AI integration further enhancing their capabilities.

Intelligent Sensing

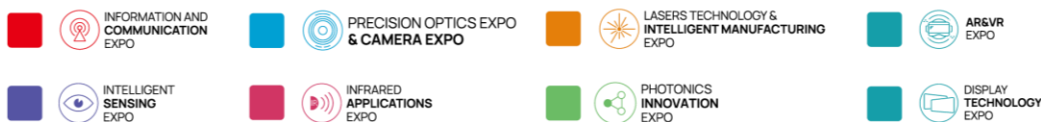

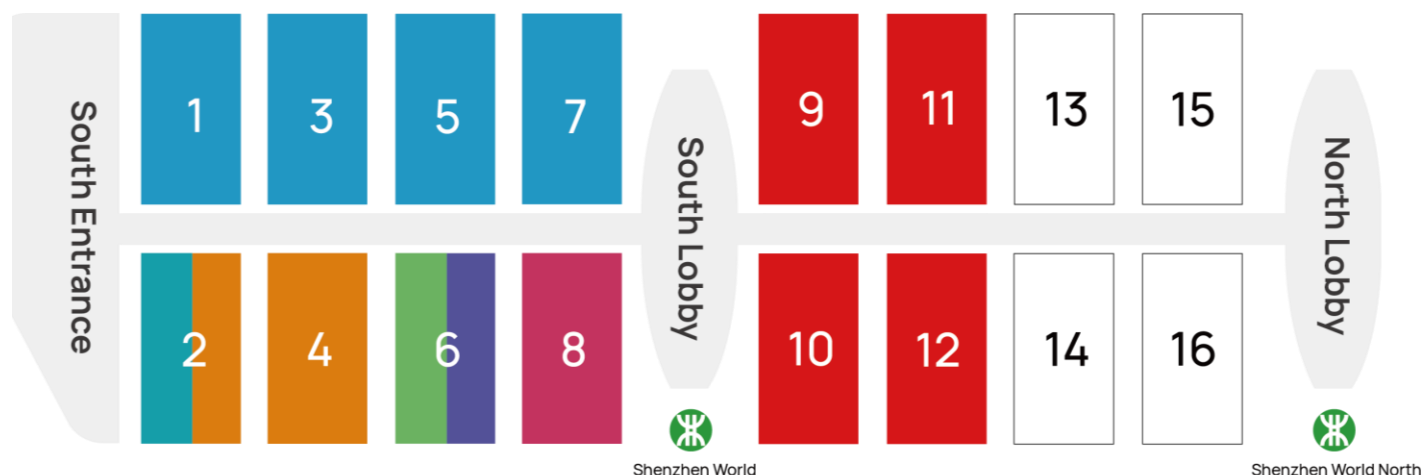

Multi-sensor fusion is becoming a fundamental trend in the evolution of intelligent systems. **LiDAR** technology is leading the way with solid-state and miniaturized designs, broadening its application scenarios. Breakthroughs in **3D vision and multi-view technologies** are revolutionizing consumer electronics and industrial inspection. As **humanoid robots** gain traction, the demand for visual sensors is set to rise significantly. **Industrial sensors** are also experiencing growth in applications across industrial automation and semiconductors, emerging as key drivers for the industry.

Display

Mini-LED technology, known for its high image quality and energy efficiency, is increasingly dominating high-end TVs, automotive displays, and more. **Micro-LED** technology is overcoming cost and technical challenges in consumer electronics, positioning itself as the preferred display solution for mid-to-high-end VR/MR products. In the consumer electronics sector, shipments of foldable phones are expected to grow, alongside a steady increase in **OLED** penetration.

FLOOR PLAN

Colocated with (Hall 13-16)

Hall 9

Integrated Wiring

- Optical Device
- Optical Fiber
- Cable/Wire and Cable
- FTTX Next Generation
- Optical Network
- Data Center
- Automotive Ethernet

Hall 10

Semiconductor and Intelligent Optical Communication Equipment

- Test and Measurement
- Information Transmission Device
- Packaging Equipment
- Semiconductor Manufacturing

Hall 11

Communication Module and Device

- Chip Design
- Compound Semiconductor/Optical Chip/Device
- Component/Module
- Automotive Optical Communication

Hall 12

Communication Module and Device

- Chip Design
- Compound Semiconductor/Optical Chip/Device
- Component/Module
- Automotive Optical Communication

Hall 1

Camera Technology and Application

- Optical Lens
- Camera Module
- Camera AA Equipment

Hall 3

Camera Technology and Application

- Test and Measurement
- Optical Injection/Modeling
- Aspherical Technology
- Sapphire Processing and Application
- Machine Vision/Industrial Application

Hall 5

Precision Optics Processing

- Ultra-Precision Processing
- Optical Component
- Optical Material
- Optical Processing Equipment

Hall 7

Optical Vacuum Coating

- Optical Coating Material
- Thin-Film and Coating Component
- Optical Coating Equipment

Hall 2

- Laser Equipment
- Laser Welding
- Intelligent Equipment and Automation
- Display Material/Panel
- Display Equipment
- AR/VR Product and Application

Hall 4

- Laser Material and Component
- Laser Module
- Lasers
- Laser Medical/Beauty

Hall 6

- LiDAR
- 3D Vision and Imaging
- Pressure/Visual Sensor
- Sensor and Detection Equipment
- Humanoid Robot
- Scientific Institute/University
- High-tech and Innovative Enterprise

Hall 8

- Thermal Infrared Imaging
- Night Vision Device and Application
- Imaging Instrument Detection
- Infrared Material
- Ultraviolet Technology and Application

Co-located Exhibition with CIOE 2025

About SEMI-e 2025

Shenzhen International Semiconductor & IC Exhibition (SEMI-e 2025)

a premier global event in the semiconductor industry, will bring together more than 1,000 distinguished global exhibitors to showcase the entire industry chain. Spanning from EDA tools, semiconductor materials, equipment manufacturing to chip design and advanced packaging applications. This professional platform synergizes business networking, international collaboration, and brand exposure for the semiconductor manufacturing, integrated circuits, electronic power, electronic manufacturing, display manufacturing, and related industries including automotive, information and communications, and consumer electronics sectors, strategically designed to unlock global business opportunities across the semiconductor value chain.

Exhibit Profile

- Chip Design and Application
- IC Fabrication
- Advanced Packaging
- Compound Semiconductor and Power Device
- Semiconductor Material
- Semiconductor Equipment
- Semiconductor Equipment Core Part
- AI Computing Power

SEMI-e at a Glance

Information and Communication Expo

CIOE – Information and Communication Expo is a premier trade show for information and communication technologies, showcasing the full industry spectrum—from **components, chips, and devices to modules, equipment, and turnkey solutions**, along with **semiconductor materials and manufacturing technologies**. Serving telecom, data center, and emerging markets, CIOE provides a global platform for equipment suppliers, system integrators, telecom operators, and internet companies to explore business opportunities, foster international collaboration, and strengthen brand visibility.

Hall 9 – Integrated Wiring

- Optical Device
- Optical Fiber Cable/Wire and Cable
- FTTX Next Generation Optical Network
- Data Center
- Automotive Ethernet

Hall 10 - Semiconductor and Intelligent Optical Communication Equipment

- Test and Measurement
- Information Transmission Device
- Packaging Equipment
- Semiconductor Manufacturing

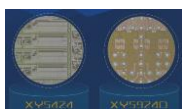

Hall 11 / 12- Communication Module and Device

- Chip Design
- Compound Semiconductor/Optical Chip/Device
- Component/Module
- Automotive Optical Communication

Precision Optics Expo & Camera Expo

CIOE – Precision Optics Expo & Camera Expo is a highly influential trade show in the optical industry. This exhibition brings together top-quality companies from the entire optical industry chain, including **optical components and materials, lenses and modules, coatings, machine vision, and optical measurement**. It serves as a dynamic platform for building an optical industry ecosystem, supporting downstream application companies in sectors such as consumer electronics, advanced manufacturing, security and defense, medical, and more. Industrial professionals can explore new applications and emerging demands in the industry, engage in fruitful business communication, collaboration, and gain valuable insights into cutting-edge applications and emerging trends.

AR & VR Expo

CIOE - AR & VR Expo focuses on the entire AR/VR supply chain, connecting upstream component suppliers, device manufacturers, solution providers, software developers, and content creators to build a full ecosystem—from core tech to end applications. It showcases **AR display modules, imaging systems, sensors, AR glasses, VR headsets**, and more, with live demos, teardowns, and case studies to boost industry adoption and commercialization.

Lasers Technology & Intelligent Manufacturing Expo

CIOE - Lasers Technology & Intelligent Manufacturing Expo, located in South China, focuses on the innovative development of laser technology in downstream processing applications. The exhibition will showcase new products and technologies in the fields of **materials, lasers, laser processing, and automation equipment**. It aims to help explore new applications and demands in the downstream application areas of the laser industry, facilitate business communication, reach commercial agreements, and gain insights into cutting-edge applications and emerging trends.

Infrared Applications Expo

CIOE - Infrared Application Expo stands as a preeminent professional platform for infrared technology in the Asia-Pacific region. The exhibition will display innovative **materials and devices to sophisticated equipment and applications in the fields of infrared, ultraviolet, and terahertz**. This event serves as a nexus for enterprises across various sectors such as power, security, consumer electronics, and energy, enabling them to scout for innovative products, exchange state-of-the-art technologies, and identify upcoming trends.

Intelligent Sensing Expo

CIOE - Intelligent Sensing Expo focuses on intelligent sensing technology and application solutions, showcasing new products, new technologies, new processes, and new applications in the sensor industry such as **3D vision, lidar, millimeter wave radar, MEMS sensing**, and so on. It also focuses on new demands in important application fields such as consumer electronics, intelligent driving, communication electronics, and intelligent manufacturing. Facilitate business contact between the sensing sector and upstream and downstream firms, establish business partnerships, learn about cutting-edge applications, and get insight into new trends.

Display Technology Expo

CIOE - Display Technology Expo will unite leading display technology experts and showcase cutting-edge products spanning the entire display industry chain. Serving as an ideal platform for brand exposure and new product launches, the event will feature **display materials, panels, modules, and equipment**, presenting a comprehensive ecosystem for procurement and business connections. This facilitates companies in meeting their purchasing needs, promoting technical exchanges, expanding their global reach, and achieving both brand and commercial objectives.

VIP Buyer Program

[CIOE VIP Buyer Program](#) is exclusively designed for key buyers and senior decision makers from the optoelectronic industry, who have specific sourcing needs or purchasing plans. CIOE offers [One2One Business Matchmaking](#) service to help buyers fast connect with matchable exhibitors/suppliers. This service facilitates more precise and efficient procurement connections and is highly recommended by buyers.

Benefits for VIP Buyer

- No queue for badge pick-up at the VIP Buyer counter.
- Exclusive welcome gift.
- Access to the VIP Lounge offering refreshments and drinks.
- First-hand visiting guides and one-on-one assistance for your visiting.

★ One2One Business Matchmaking Service Free

- Quick access to a vast supply chain ecosystem with 3,800+ exhibitors.
- One-stop sourcing from components to manufacturing solutions.
- Pre-arrange **1-on-1 meetings in the VIP lounge** with high-value suppliers.
- Priority invitations to international networking events. (Limited seats)

[Submit Sourcing Request](#)[View all Sourcing Requests](#)

★ Happy Hour: Elevating Connections Over Cocktails

Immerse yourself in the dynamic yet comfortable ambiance of the CIOE 2025 Happy Hour—a premier networking opportunity where industry professionals connect naturally and effectively. Indulge in a selection of fine beverages, light bites, and enriching dialogues that pave the way for innovative collaborations and strengthen existing industry relationships.

This thoughtfully designed social interlude provides the perfect backdrop for both serendipitous encounters and purposeful networking, allowing you to build your professional circle while enjoying a well-deserved break from the exhibition's pace.

Date: September 11, 2025

Venue: VIP Lounge

Attendees: All VIP / Buyers & Exhibitors

[Register as a VIP Buyer](#) to secure all benefits

Note: For 3 and more delegates, [download the <Delegation Registration Form>](#), complete and send it to **Eileen Chen** Eileen.chen@cioe.cn

Networking Opportunities: Connect, Collaborate, and Celebrate

CEO Night: Illuminating the Future of Information and Communication

CEO Night at CIOE 2025, a prestigious networking reception bringing together top executives and industry experts from the information and communication sector. This high-profile gathering will feature leaders from the China Academy of Information and Communications Technology (CAICT), major telecom operators, data centers, communication equipment manufacturers, and key component/module suppliers.

Date: September 9, 2025 17:30 -21:00

Venue: To be confirmed

Attendees: Top executives & industry experts from Information and Communication Sector

Registration: By Invitation Only

Gala Dinner: A Night of Innovation & Networking

Welcome to the pinnacle of industry celebration at the CIOE 2025 Gala Dinner—an exclusive evening where innovation meets elegance. This prestigious gathering brings together the most influential minds in photonics and optoelectronics for an unforgettable night of meaningful connections and visionary exchange. As the signature social event of CIOE 2025, the Gala Dinner offers a sophisticated atmosphere where industry leaders, pioneering researchers, and technology visionaries converge to celebrate achievements, forge strategic partnerships, and glimpse the future of our rapidly evolving field.

Date: September 10, 2025 18:00 -21:00

Venue: To be confirmed

Attendees: By Invitation Only
